Volume 87 A-Z January-December 2000

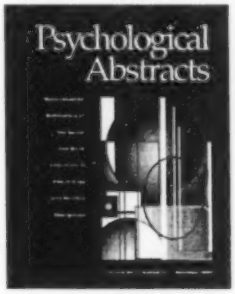
Trusted Worldwide as the Authoritative Printed Reference in Psychology

Now a single print product gives users access to chapter, book, and journal information from all areas of psychology and related disciplines. APA's *Psychological Abstracts (PA)* brings users nearly 3,000 journal abstracts every month and NOW includes book chapter and book information.* Both psychologists and librarians have reported that they want the convenience of having a single source for ALL of the information available from books, book chapters, and journals. That's why chapter and book summaries are included in the monthly issues of *PA*.**

PA gives your users an overview of research in psychology and related fields, sums up articles from over 1,200 English-language journals and over 1,200 books annually, shows everything that's new in a given specialty, and much more!

Don't miss out on psychology's richest resource on current literature! *PA* is priced at $1,139 per year for institutions. Well worth it for over 3,200 journal *and* book abstracts per month!

For more information, write to:
American Psychological Association, 750 First Street, NE, Washington, DC 20002-4242, or call (800) 374-2722. In Washington, DC, call (202) 336-5650.



Psychological Abstracts...

- reports advances appearing in journals and books that may not be read on a regular basis
- enables users to pick up main ideas at a glance by highlighting the key points in a given document
- saves research time by virtue of *PA* complete bibliographic data for all citations
- and lets users find what they need in a hurry with its reader-friendly indexes for each month and year

* This book-related material previously appeared separately in *PsycBOOKS*.

** Summaries in *PA* will continue to be grouped by subject classification, as well as now by source: SERIAL, BOOKS, and CHAPTERS. We've retained the style which *PA* subscribers find most efficient, and integrated the strengths of the former version of *PsycBOOKS*.

2000 COVERAGE LIST

The PsycINFO Coverage List includes journals and other serial publications that are scanned regularly, abstracted selectively, and included in *Psychological Abstracts (PA)*. PsycLIT, ClinPSYC, and the PsycINFO database. In cases where a journal publishes articles only in a language other than English, the abstracts for these journal articles will be included in PsycLIT, ClinPSYC, and PsycINFO database, but will not appear in *Psychological Abstracts*. A dagger (†) after the title indicates this occurrence. For journals that publish articles both in English and in other languages, only the abstracts of the English language articles will be included in *PA* while both English and non-English language articles will appear in PsycLIT, ClinPSYC, and the PsycINFO database.

The presence of a serial title in the list does not imply that all articles contained in issues of that serial will subsequently appear in PsycINFO's databases or print products. Journals likely to publish articles relevant to behavior are included for regular systematic scan of their content. Articles are selected specifically and individually for their relevance to psychology.

Whenever possible, publisher name, address, frequency of publication, and ISSN are included for each publication to facilitate access to original documents by users. The date in parenthesis indicates the publication year of the first issue scanned by PsycINFO of a particular serial. Asterisks within parenthesis indicate that coverage began with the first issue of publication. An N/A after an ISSN indicates that the number was not available. Bold type identifies those journals that published articles appearing in this volume year.

This Annual Author Index contains over 100,000 references to the authors and editors of approximately 40,000 abstract records published in the 12 monthly issues of *Psychological Abstracts* from January 2000 through December 2000. A companion work, the Annual Subject Index, references these records by topic.

In this volume, all the authors and editors whose work was abstracted or cited in Psychological Abstracts for the periods indicated are listed alphabetically by surname. However, the Author Index is intended to be a name index only and not a person index. "Adams, P." will be listed separately from Adams, Paul," even though the names may refer to the same person. Two listings for "Adams, P." may also refer to two different authors. Entries consist of author name(s), and the *Psychological Abstracts* abstract number under which the entry appeared.

Which side are you on, anyway?

Well, okay. We know it's not *that* simple. Current research in neuropsychology yields an understanding of left-brain/right-brain dominance that is more complex and subtle, compared to earlier investigations or popular conceptions. But one thing hasn't changed. The place to find the latest research on this topic is the PsycINFO® family of information products from the American Psychological Association, whether you prefer online services, the Web, CD-ROM, or print. And that also goes for the thousands of other subjects covered in APA's PsycINFO and ClinPSYC® databases and the print *Psychological Abstracts*,® including psychological aspects of such diverse fields as artificial intelligence, health care, management, advertising, education, criminal justice, arts and humanities, and many others. So give *both* sides of your brain the psychological information they need. Trust PsycINFO products for your research.
